1.

```
3 public class Main{
4     public static void main(String[] args){
5         Scanner sc = new Scanner(System.in);
6
7         ArrayList<String> students = new ArrayList<>();
8
9         for (int i = 0; i < 8; i++){
10             students.add(sc.nextLine());
11         }
12
13         Iterator<String> it = students.iterator();
14
15         while (it.hasNext()){
16             System.out.println(it.next());
17         }
18         System.out.println("Total Students:"+students.size());
19     }
20 }
```

Princess

Angels

Output

Srithika

Priya

Princess

Angels

Kriti

Cutie

2.

```
public class Main {
    public static void main(String[] args) {
        while (count < n) {
            int sum = 1;

            for (int i = 2; i <= num / 2; i++) {
                if (num % i == 0) {
                    sum += i;
                }
            }

            if (num > 1 && sum == num) {
                System.out.println(num);
                count++;
            }

            num++;
        }
    }
}
```

3.

Your Code

```
1 import java.util.*;
2
3 public class Main {
4     public static void main(String[] args) {
5         Scanner sc = new Scanner(System.in);
6
7         ArrayList<Double> prices = new ArrayList<>();
8
9         System.out.println("Enter 10 product prices:");
10        for (int i = 0; i < 10; i++) {
11            prices.add(sc.nextDouble());
12        }
13
14        Iterator<Double> it = prices.iterator();
15
16        double total = 0;
17        double max = Double.MIN_VALUE;
```

Input

100
200
150
300
...

Output

```
Enter 10 product prices:
Total Price = 3300.0
Average Price = 330.0
Highest Price = 600.0
```
