SMART CRIME PREDICTION & EMERGENCY RESPONSE

Safe City AI

Citizens report incidents, an explainable risk model reads the pattern, admins assign the case to a police officer, and the officer verifies it and works it through to resolution — all tracked live, with notifications at every handoff.

Try the risk predictor →

📄

MODULE 01 • CITIZEN

Report, Verify & Manage

Citizens submit crime reports. Admins review and assign each one to a police officer, who verifies it and can be given follow-up tasks.

Report a Crime →

🧠

MODULE 02 • AI

Crime Pattern Analysis & Risk Prediction

Historical reports are analysed by location and crime type to classify risk as Low, Medium, or High — with a reason, not just a score.

Predict Risk →

🚒

MODULE 03 • RESPONSE

Emergency Response & Notifications

High-risk predictions surface emergency contacts, and every assignment, verification, task, and deadline fires a live notification.
